

1 REVIEW OF ASSESSMENT/IM TOOLS & DATA GAPS

- Review existing assessment & IM tools (DTM, MSNA, sector tools)
- Map geographic, population & temporal data gaps
- Assess data quality & completeness
- Identify priority gaps by severity & risk

OUTPUTS:

- Assessment Registry
- Data Mapping Table
- Data Gap Analysis Report (Heatmap & Matrix)

2 REVIEW & FINALIZATION OF DATA COLLECTION TOOLS & PARTNERS

- Harmonize assessment tools (Kobo/ODK, Mobile App)
 - Align with NDMO & IOM DTM standards
 - Define roles & responsibilities
 - Establish data sharing agreements
 - Ensure offline functionality & backup
- PARTNERS' ROLE:**
Data collection, field support, sector expertise, analysis, reporting & feedback

OUTPUTS:

- Harmonized Assessment Tools (Kobo/ODK)
- Partner Responsibility Matrix
- Data Sharing MoU

3 DISPLACEMENT DATA FRAMEWORK FINALIZATION

- Define core indicators & variables
- Ensure disaggregation (SADD, vulnerability markers)
- Develop data dictionary & metadata standards
- Design database structure
- Ensure interoperability with NDMO & humanitarian systems

OUTPUTS:

- Displacement Data Framework Document
- Indicator Dictionary
- Database Schema

4 USER MANAGEMENT – UPLOAD, CLEANING & VALIDATION

- Role-based access management
- Data upload (online/offline)
- Automated validation rules
- Manual data cleaning
- Data validation & approval workflow

OUTPUTS:

- Clean & Validated Data
- Audit Logs & Reports

5 INFORMATION MANAGEMENT PORTAL – DASHBOARDS & ANALYSIS

- Real-time dashboards
- Interactive maps
- Trend analysis & reporting
- Export & data sharing
- Role-based access

OUTPUTS:

- DECM Cluster Website
- Dashboards
- Reports & Analytics
- Data Storage & Repository

6 CONTACT MANAGEMENT & INFORMATION CIRCULATION

- Centralized contact database
- Circulate IM products & datasets
- Support early warning information sharing (NDMO-led)
- Track response coordination (3W/4W)
- Feedback & lessons learned

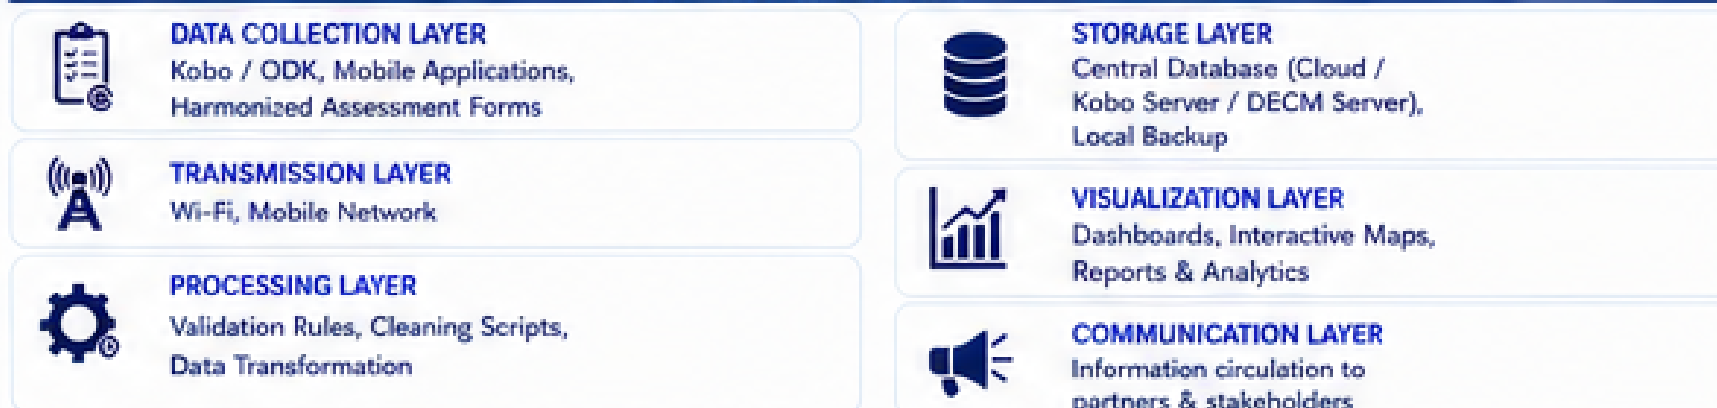

OUTPUTS:

- Centralized Contact Database
- Information Circulation Log
- Response Tracking

END-TO-END DATA WORKFLOW

SYSTEM ARCHITECTURE

USER ROLES & PERMISSIONS

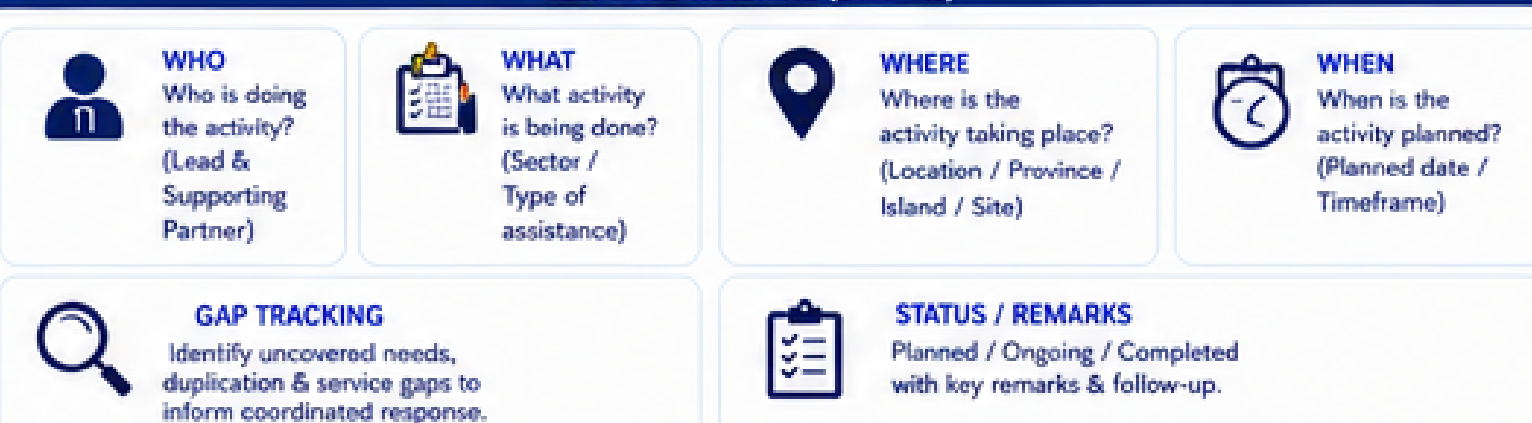

Role	Upload	Clean	Validate	Approve	Delete	Export	Dashboard Edit	User Admin
Data Enumerator	✓	✓	✗	✗	✗	✗	✗	✗
Data Cleaner	✓	✓	✓	✗	✗	✗	✗	✗
Validator	✓	✓	✓	✗	✗	✗	✗	✗
IOM IM Officer	✓	✓	✓	✓	✓	✓	✓	✓
NDMO Admin	✓	✓	✓	✓	✓	✓	✓	✓
Partner Viewer	✗	✗	✗	✗	✗	✗	✓	✗
DECM Cluster Lead (Full Access)	✓	✓	✓	✓	✓	✓	✓	✓

✓ = Full Access ⚡ = Limited / Own Data ✗ = No Access

CORE DISPLACEMENT INDICATORS (DRAFT)

Category	Key Indicators	Data Source
Mobility	Total number of IDPs (HH & Individuals)	Site Assessment / Mobility Tracking
Mobility	Type of displacement (Evacuation Site, Host family, Public building)	Site Assessment
Location	Province / Island (Admin level 1-2)	Site Assessment
Needs	Top 3 immediate needs (Shelter, WASH, Food)	Site Assessment
Site Management	% sites with functional WASH facilities & access to basic services	Site Assessment
Site Management	Service provision and service provide mapping	Site
Protection	Number of UASC (Unaccompanied / Separated Children)	Registration
Return Intention	Intention to return (Yes/No/Undecided)	Intention Survey
Durable Solution	Main barriers to return (Damaged home, Security, Funds)	Intention Survey

RESPONSE TRACKING (3W / 4W)

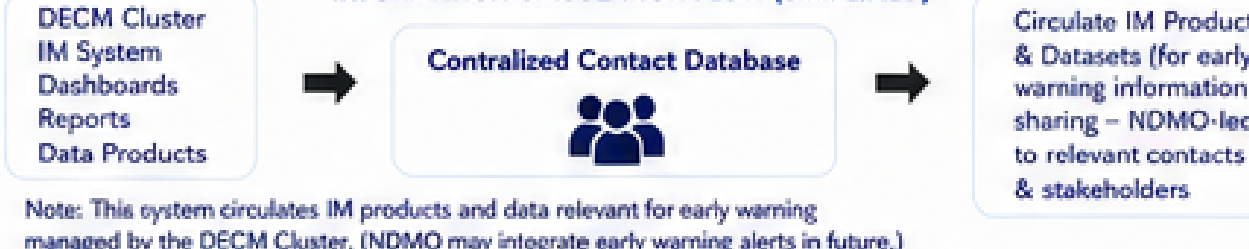

AUTOMATED RULES

- People count > 0 and < 1000
- Displacement date ≤ today()
- GPS coordinates within Vanuatu bounding box
- Province code in (TOR, SAN, PEN, MAL, SHE, TAF)
- Cross-check with key informants / secondary sources

DATA VALIDATION RULES (KEY EXAMPLES)

- AUTOMATED CHECKS**
- Range & logic checks
 - Mandatory field checks
 - GPS boundary validation
 - Date consistency
 - Duplicate record detection
- MANUAL CHECKS**
- Field supervisor review
 - Outlier verification
 - Cross-check with KIs
 - Spot-check samples
 - Partner feedback loop

INFORMATION CIRCULATION FLOW (SIMPLIFIED)

BEST PRACTICES (VANUATU CONTEXT)

- Offline-first: Tools work without internet; sync when available
- Government-led: NDMO ownership & local leadership
- Localization: Involve communities, use local languages (Bislama)
- Data Quality: Standardized tools, validation rules, regular training
- Data Protection: Consent, confidentiality, secure storage
- Interoperability: Align with OCHA 3W/4W, other clusters & government systems
- Inclusion: Gender, disability & vulnerable groups
- Preparedness Focus: Pre-position tools, train teams before disasters
